COLLEGE OF HEALTH
CLEVELAND STATE UNIVERSITY

TRANSDISCIPLINARY HEALTH, SCIENCES AND TECHNOLOGY

Cleveland State University's College of Health strives to provide progressive, relevant programs that prepare students to think deeply about their practice, teaching and research, to impact healthcare and meet the ever-changing needs of our community.

Our innovative new Transdisciplinary Health, Sciences and Technology (THST) Ph.D. program transcends traditional health care, integrating engineering, urban studies, education and other fields with health disciplines. Our mission is to prepare students to tackle complex challenges and lead initiatives, recognizing the impact and potential of advancing technologies to transform healthcare fields. By integrating multiple disciplines, our program equips future leaders to develop and implement transdisciplinary solutions that enhance patient outcomes and revolutionize healthcare practice.

THST PH.D. PROGRAM

Our THST Ph.D. program uniquely prepares students for in-depth scientific research while integrating the study of technology to address health and health education. We utilize transdisciplinary practices to collaborate with innovative research teams within the College of Health and across campus. Courses are broad in content and structure and emphasize healthcare equity for diverse populations. Students also gain teaching skills to share transdisciplinary, technology-informed practices with future students. We offer flexible degree plans tailored to meet your needs and disciplinary interests with guidance from a dedicated advisor.

- 60 credit hours
- Rolling admissions
- Flexible hybrid format with classes in-person and online
- Complete full-time in as few as two years and four months (seven semesters including summers)*
- Complete part-time in as few as three years and four months (10 semesters including summers)*

**Completion time varies based on courseloads, summer courses and dissertation timelines.*
