CLEVELAND STATE UNIVERSITY

# NURSING

## REGISTERED NURSE (R.N.) TO BACHELOR OF SCIENCE IN NURSING (B.S.N.)

Obtaining a B.S.N. is vital to advancing your nursing career. Registered Nurses who continue their education gain critical skills that can help them achieve success in leadership, administration, management, research, education, community health and other specialty positions.

CSU's community-based R.N. to B.S.N. program prepares students for success in today's healthcare environment. The program is designed specifically for students who already hold an active R.N. license and is offered in a flexible online format, so working professionals can make the most of their time. Our program is a cost-effective option to add credentials, assist with career advancement and support acceptance into post-baccalaureate and graduate nursing programs in as little as three semesters.
